

Hao Wang

Graduate Student

Address San Diego, CA, 92130

Phone 626-362-6668

E-mail haw126@ucsd.edu

Education

Expected in 2026-03

Master of Science: Data Science

University of California, San Diego - La Jolla, CA

- Current GPA: 4.0/4

2023-09

Bachelor of Science: Cellular And Molecular Biology

University of California, Riverside

- Cumulative GPA: 3.8/4
- Upper Division GPA: 3.94/4
- cum laude graduate

Research Experience

2024-06 - 2024-09

Data Analyst (Internship)

Second Affiliated Hospital, Xiamen Medical College

- Participated in a prescription review project and performed retrospective analyses on medications commonly used for antihypertensive and chemotherapy treatments
- Analyzed electronic medical records (EMRs) from oncology and cardiology departments, collecting and cleaning a sample of approximately 7,500 records, including scanned handwritten entries.
- Used tools in Python to preprocess and segment Chinese medical text

2023-10 - 2024-05

Research Assistant

NanHao's Laboratory, University Of California, San Diego

- S.B Fructose Uptake Amplification Project
- Working with Postdoc Xiaohuan in a project aimed at amplifying fructose uptake in a yeast species through targeted genetic modifications, enhancing understanding of Hexose metabolism.
- Adapted existing genome-scale metabolic models to predict yeast growth rates under varying conditions.

- Conducted yeast transformations and optimized conditions for improved fructose utilization.

2022-09 - 2023-09

Undergraduate Student Intern

NanHao's Laboratory, University Of California, San Diego

- Yeast Cell Aging Model Development Project
- Collaborated closely with project leader, Sam, on building aging model based on morphology of yeast cells. This endeavor aimed to probe causes of cellular aging further.
- Working remotely, using image processing tool ImageJ/Fiji for segmentation and morphological analysis

2022-02 - 2022-12

Undergraduate Student Intern

Chenmeng's Laboratory, University Of California, Riverside

- Phytochrome Signaling and Nuclear Organization Project
- Investigated the role of phytochrome proteins in the spatial organization of the nucleus and gene regulation in plants.
- Utilized fluorescent microscopy to visualize phytochrome interactions and chromatin organization.

2019-06 - 2019-08

Summer Research Intern

Yuanjing's Laboratory , Xiamen University

- Plasmodium Transmission Dynamics and CRISPR Project
- Engaged in research focusing on Plasmodium transmission and infection mechanisms, assisted with the enhancement of gene function analysis using CRISPR/Cas9 genome editing.

Skills

Biomedical Natural Language Processing

Text Mining

Relational/Graph database design

Experience with Spark and SQL

CRISPR-Cas9 DNA Sequence Design
